# Maya Chen

AI / Machine Learning Engineer

San Jose, CA • maya.chen@email.com • (408) 555-0192 • linkedin.com/in/mayachen
github.com/mayachen • mayachen.dev

## SUMMARY

Machine learning engineer who moved from data analytics into AI, with hands-on experience building and deploying end-to-end ML and LLM-powered systems. Strong in Python, PyTorch, and MLOps, with a track record of shipping models that move measurable business metrics. Seeking an AI/ML engineering role owning models from prototype to production.

## TECHNICAL SKILLS

**Languages:** Python, SQL, JavaScript, Bash
**ML & Deep Learning:** PyTorch, TensorFlow, scikit-learn, XGBoost, Hugging Face Transformers
**LLMs & GenAI:** RAG, LangChain, prompt engineering, LoRA fine-tuning, vector DBs (Pinecone, FAISS)
**MLOps & Deployment:** Docker, FastAPI, MLflow, Git, GitHub Actions (CI/CD), Airflow
**Cloud & Data:** AWS (SageMaker, EC2, S3, Lambda), GCP, PostgreSQL, pandas, Spark

## EXPERIENCE

**AI Engineer, Capstone Project — Nimbus Labs** Jan 2026 – Apr 2026
*Industry-partner capstone through AI Engineering Bootcamp · Remote*

- Built and deployed a retrieval-augmented (RAG) support assistant over 12,000 help-center articles, cutting average ticket resolution time **34%** in user testing.
- Fine-tuned a DistilBERT classifier to route tickets across 9 categories at **92% accuracy**, replacing a manual triage process.
- Containerized the system with Docker and served it via a FastAPI endpoint on AWS, sustaining **<300ms p95 latency** under load testing.

**Data Analyst — Brightpath Retail** Jun 2021 – Dec 2025
*San Jose, CA*

- Developed a churn-prediction model (XGBoost) on 500K records that improved recall **18%** over the prior heuristic, flagging **$1.2M** in at-risk annual revenue.
- Built automated reporting pipelines in Python and SQL that replaced manual spreadsheets, saving the team **~15 hours per week**.
- Designed and analyzed A/B tests with the marketing team, identifying a variant that lifted conversion **11%**.
- Created Tableau dashboards used daily by 40+ stakeholders to track KPIs across 6 regions.

## PROJECTS

**Semantic Code Search Engine** github.com/mayachen/codesearch

- Built a natural-language code search tool using sentence-transformer embeddings and a FAISS index over 50K Python functions; returns relevant snippets in **<100ms**.
- Shipped an interactive Streamlit demo that reached 300+ users in its first month.

**Tech:** Python, Hugging Face, FAISS, Streamlit, Docker

**Real-Time Image Captioning API** github.com/mayachen/captionapi

- Trained a CNN-LSTM captioning model (BLEU-4 of 0.31 on MS-COCO) and served it as a REST API behind a rate-limited gateway.
- Set up a GitHub Actions CI/CD pipeline with automated tests, cutting deploy time from 20 minutes to **under 3**.

**Tech:** PyTorch, FastAPI, AWS Lambda, GitHub Actions

## EDUCATION & CERTIFICATIONS

**AI Engineering Bootcamp — Cohort 2026** 2025 – 2026
*600+ hours of project-based training in ML, deep learning, LLMs, and MLOps.*

**B.S. in Statistics — San Jose State University** 2017 – 2021

**Certifications:** AWS Certified Machine Learning – Specialty (2026) • DeepLearning.AI Deep Learning Specialization
